Effects when using for color change

Comparisons from changing color to proper ink density

- Paper waste : Reduce papers when achieving the ink density
- Cleaning time : Reduce multiple washing times
- Printing time : Reduce time from color change washing to printing completion
- Each cost : Reduce labor cost, ink, material costs etc.

※ The effect can be significant depending on the machine, substrate, and materials.

How to use

1. Clean the rollers with wash.
2. Spread KAGAYAKI-03 to the rollers throughout by idling for 3 to 5 minutes.
3. After idling, clean the roller again with the blade on.

⚠ Cautions to take when using

- Clean the roller throughout in order not to remain on the roller surface.
- Applying large amount may cause roller slipping, poor cleaning performance or scattering.
- Idling time after application should be less than 10 minutes
- Contamination on plate may affect adversely the printing quality.
